Daniel Anthony S. Estrella

SOFTWARE DEVELOPMENT · BACKEND ENGINEER

Backend Developer and versatile IT professional with hands-on experience in enterprise-level microservice architecture using ASP.NET Core (C#) and REST APIs, having independently developed over 130 REST API endpoints across production systems. Skilled in creative media production, data management, and IT support. Magna Cum Laude graduate of BS Information Technology at Centro Escolar University Malolos. Open to software engineering, creative & multimedia, data entry, IT support, and freelance roles.

PROFESSIONAL EXPERIENCE

XENTRA SOLUTIONS, INC.

JUNIOR BACKEND DEVELOPER

September 2025 — Present

- 01 Led backend development for an upcoming product version, building over **130 RESTful API** endpoints across the microservice ecosystem within **1.5 months**.
- 02 Manages **7 microservice Git repositories**, overseeing branch strategy, code integration, version control practices, and interservice RESTful API communication patterns.
- 03 Translates Figma designs into backend specifications and API contracts, deriving and confirming **130+** endpoint definitions and response shapes in coordination with client-side developers.
- 04 Coordinates with 4 client-side developers (2 Next.js, 2 mobile) to align API response shapes and payload structures, and collaborates with 2 QA testers to investigate and resolve backend bugs.
- 05 Designs and maintains dedicated relational database schemas per microservice, creating **10+ tables** and modifying 7 existing ones to support new features aligned with client requirements.
- 06 Participates in Agile ceremonies including daily standups, managing tasks across Scrum and Kanban workflows in JIRA for sprint planning and progress tracking.

KEY PROJECT | BREWBANK

 brewbank.app

Contributed to the backend microservice architecture of BrewBank — a prepaid coffee loyalty platform for Australian cafés — focusing on core transaction and redemption API workflows using ASP.NET Core and MariaDB.

ASP.NET Core (C#) REST APIs Microservices MariaDB JIRA / Agile

BACKEND DEVELOPER INTERN

January 2025 — May 2025 · 500+ hours

- 01 Studied a production-grade microservice ecosystem firsthand, gaining practical understanding of **interservice REST API communication** and API consumption patterns across distributed services.
- 02 Designed relational database schemas as part of structured training exercises, producing **5–10 tables** with normalized relationships to model real-world business data.
- 03 Built **10–20 practice CRUD endpoints** using ASP.NET Core (C#), applying interservice API consumption patterns to simulate real microservice communication flows.
- 04 Implemented **Role-Based Access Control (RBAC)** within a working codebase, configuring role definitions, permission scopes, and route-level authorization middleware.

INTERNSHIP PROJECT | LATINPAY

 latinpay.com

Studied LatinPay — a U.S.-based fintech platform serving the Latin American community with prepaid Visa cards, mobile top-up, and bill payments — as a live reference system during internship training. Participated in daily standups, gaining firsthand exposure to how a professional development team operates and manages sprint work.

CENTRO ESCOLAR UNIVERSITY MALOLOS

DATA ENTRY INTERN
2025 · 50 Hours · Physical Plant & Facilities Department

- 01 Digitized manual pen-and-paper facility logs and records into structured **Google Sheets** spreadsheets, improving data accessibility and reducing retrieval time for department staff.
- 02 Ensured accuracy and consistency of encoded data by cross-referencing physical records, applying data validation practices throughout the digitization process.
- 03 Completed the required **50-hour institutional internship** as part of the BS Information Technology curriculum, demonstrating reliability and attention to detail in a non-technical office environment.

EDUCATION

CENTRO ESCOLAR UNIVERSITY MALOLOS

2021 — 2025

Bachelor of Science in Information Technology

MAGNA CUM LAUDE

Graduated with high distinction · GWA 1.25 · Top 8 Overall, Highest-Ranking Male Graduate

- Top 8 Overall Graduate
- Highest-Ranking Male Graduate
- Dean's List — 1st Year
- Consistent President's List — 2nd to 4th Year
- Research Forum: 1st in Oral Presentations
- Research Forum: 3rd in Poster Presentations
- Meritorious Award in Research

SECONDARY EDUCATION

ST. MARY'S COLLEGE OF MEYCAUAYAN

2019 — 2021

Senior High School · Accountancy, Business and Management (ABM) Strand

LICENSES & CERTIFICATIONS

- 01 **Oracle Cloud 2025 Certified Developer Professional**
Oracle University · Oct 2025 — Oct 2027 ·  [Credential](#)
- 02 **Fortinet Certified Associate in Cybersecurity**
Fortinet Training Institute · May 2025 — May 2027 ·  [Credential](#)
- 03 **Fortinet Certified Fundamentals in Cybersecurity**
Fortinet · May 2025 — May 2027 ·  [Credential](#)
- 04 **Foundational C# with Microsoft**
freeCodeCamp / Microsoft · Jun 2025 ·  [Credential](#)
- 05 **Oracle Cloud 2025 Certified AI Foundations Associate**
Oracle University · Oct 2025 — Oct 2027 ·  [Credential](#)
- 06 **NC2: Computer Systems Servicing**
TESDA · Jul 2022 — Jul 2027

PROJECTS

FULL STACK DEVELOPER

CEU VAULT

Full-stack equipment reservation system digitizing a manual pen-and-paper lending facility. Designed and implemented both client-side and server-side components using an Express backend, HTML5/Bootstrap frontend, and a modular MVC-inspired architecture — integrating REST APIs, PostgreSQL, Redis, Nodemailer, and PDF generation.

- HTML/CSS
- Bootstrap
- Express.js
- PostgreSQL
- Redis Cloud
- Neon DB
- Vercel

Oct 2024 — Dec 2024

-  Live site

- USER **admin@test.com**
- PASS **admin123**

FULL STACK DEVELOPER

HOTEL BOOKING SYSTEM

Solo-built full-stack hotel management system comprising a 15-endpoint RESTful API and a Bootstrap front-end dashboard, built on Node.js and Express with a modular MVC-inspired architecture. Covers room, guest, and booking workflows with Yup request validation, a normalized 3-table PostgreSQL schema, and third-party weather data fetched from Open-Meteo and stored as JSONB. Automates booking completion via a node-cron scheduled job and includes Jest unit tests with mocked database calls.

- Node.js
- Express.js
- PostgreSQL
- REST APIs
- Yup
- Jest
- node-cron
- HTML
- CSS
