daniel.anth.est.03@gmail.com

 [linkedin.com/in/daniel-est](https://www.linkedin.com/in/daniel-est)  daniel-est.vercel.app

Magna Cum Laude BS Information Technology graduate and Career Service Professional Eligible who builds and ships production software by directing Claude Code end-to-end — owning the architecture and stack decisions, negotiating tradeoffs, and driving AI-assisted implementation against a test-gated CI safety net. Independently delivered 130+ RESTful endpoints across 7 microservice repositories in a live commercial product, and solo-architecting CEDAR, an internal accreditation and compliance system under active development for Centro Escolar University Malolos. Comfortable with Microsoft 365 administration, day-to-day IT troubleshooting, and turning a rough idea into a working tool fast.

PROFESSIONAL EXPERIENCE

XENTRA SOLUTIONS, INC.

JUNIOR BACKEND DEVELOPER
September 2025 — May 2026

- 01 Led backend development for an upcoming product version, building over **130 RESTful API** endpoints across the microservice ecosystem within **1.5 months**.
- 02 Manages **7 microservice Git repositories**, overseeing branch strategy, code integration, version control practices, and interservice RESTful API communication patterns.
- 03 Translates Figma designs into backend specifications and API contracts, deriving and confirming **130+** endpoint definitions and response shapes in coordination with client-side developers.
- 04 Coordinates with 4 client-side developers (2 Next.js, 2 mobile) to align API response shapes and payload structures, and collaborates with 2 QA testers to investigate and resolve backend bugs.
- 05 Designs and maintains dedicated relational database schemas per microservice, creating **10+ tables** and modifying 7 existing ones to support new features aligned with client requirements.
- 06 Participates in Agile ceremonies including daily standups, managing tasks across Scrum and Kanban workflows in JIRA for sprint planning and progress tracking.
- 07 Used **Claude** as the primary way of writing and shipping backend code from day one, relying on that AI-directed workflow to sustain the 130+ endpoint buildout within the compressed 1.5-month delivery window.

KEY PROJECT | BREWBANK

 brewbank.app

Contributed to the backend microservice architecture of BrewBank — a prepaid coffee loyalty platform for Australian cafés — focusing on core transaction and redemption API workflows using ASP.NET Core and MariaDB.

BACKEND DEVELOPER INTERN

January 2025 — May 2025 · 500+ hours

- 01 Studied a production-grade microservice ecosystem firsthand, gaining practical understanding of **interservice REST API communication** and API consumption patterns across distributed services.
- 02 Designed relational database schemas as part of structured training exercises, producing **5–10 tables** with normalized relationships to model real-world business data.
- 03 Built **10–20 practice CRUD endpoints** using ASP.NET Core (C#), applying interservice API consumption patterns to simulate real microservice communication flows.
- 04 Implemented **Role-Based Access Control (RBAC)** within a working codebase, configuring role definitions, permission scopes, and route-level authorization middleware.
- 05 Began directing **Claude** for practice endpoint and schema work during the internship, establishing the AI-directed development workflow later carried into the full-time role.

INTERNSHIP PROJECT

LATINPAY

 latinpay.com

Studied LatinPay — a U.S.-based fintech platform serving the Latin American community with prepaid Visa cards, mobile top-up, and bill payments — as a live reference system during internship training. Participated in daily standups, gaining firsthand exposure to how a professional development team operates and manages sprint work.

INTERNSHIP — INSTITUTIONAL

CENTRO ESCOLAR UNIVERSITY MALOLOS

DATA ENTRY INTERN
2025 · 50 Hours · Physical Plant & Facilities Department

- 01

Digitized manual pen-and-paper facility logs and records into structured **Google Sheets** spreadsheets, improving data accessibility and reducing retrieval time for department staff.
- 02

Ensured accuracy and consistency of encoded data by cross-referencing physical records, applying data validation practices throughout the digitization process.
- 03

Completed the required **50-hour institutional internship** as part of the BS Information Technology curriculum, demonstrating reliability and attention to detail in a non-technical office environment.

LICENSES & CERTIFICATIONS

01

Career Service Professional Eligibility (Honor Graduate)
Civil Service Commission, Regional Office III · Effective May 2025

02

Oracle Cloud 2025 Certified Developer Professional
Oracle University · Oct 2025 — Oct 2027 ·  [Credential](#)

03

Fortinet Certified Associate in Cybersecurity
Fortinet Training Institute · May 2025 — May 2027 ·  [Credential](#)

04

Foundational C# with Microsoft
freeCodeCamp / Microsoft · Jun 2025 ·  [Credential](#)

05

Oracle Cloud 2025 Certified AI Foundations Associate
Oracle University · Oct 2025 — Oct 2027 ·  [Credential](#)

06

NC2: Computer Systems Servicing
TESDA · Jul 2022 — Jul 2027

PROJECTS

SOLO ARCHITECT & FULL STACK DEVELOPER · AI-ASSISTED BUILD · JUN 2026 — PRESENT

CEDAR — ACCREDITATION REPOSITORY

Role-based repository holding the accreditation evidence of all 13 academic programs at Centro Escolar University Malolos — the system of record ahead of survey visits, replacing shared drives. Architected and built solo: ASP.NET Core 10 on Clean Architecture with vertical slices, EF Core 10 / PostgreSQL, a Next.js App Router front end, and a private Cloudflare R2 bucket reachable only by signed URL.

Tamper-evident by construction. Append-only versions and audit trail enforced three independent ways — EF interceptors, Postgres triggers, and a runtime DB role with UPDATE/DELETE revoked.

Hardened delivery. Nonce-enforced CSP, magic-byte upload validation, and dependency scanning that fails the CI build.

Defense-in-depth access control. Four capability roles; denial answers 404, so an unauthorized reader cannot even confirm a document exists.

Zero-trust document previews. PDF / Word / Excel / CSV parsed inside an opaque-origin sandboxed iframe with no network — evidence never reaches a third-party embed.

Sessions built for shared campus PCs. Opaque server-side tokens over Google OAuth, instant revocation, 2-hour idle cutoff.

Decisions are documented, not tribal. 40 written architecture decision records, each naming the choice made and the alternatives rejected.

AI-assisted engineering workflow. Claude Code as the implementation engine under a spec-first loop — I decide the stack and non-negotiables (ASP.NET Core, EF Core, C#; Google Sign-In, since CEU runs on Google Workspace), negotiate the tradeoffs on Claude's proposals — pushing for alternatives whenever a suggestion would compromise security — and set the acceptance criteria each session is driven against. Claude documents every decision as an ADR and implements against a test suite and CI pipeline it maintains, giving an objective, automated check on generated code.

FULL STACK DEVELOPER

HOTEL BOOKING SYSTEM

Solo-built full-stack hotel management system comprising a 15-endpoint RESTful API and a Bootstrap front-end dashboard, built on Node.js and Express with a modular MVC-inspired architecture. Covers room, guest, and booking workflows with Yup request validation, a normalized 3-table PostgreSQL schema, and third-party weather data fetched from Open-Meteo and stored as JSONB. Automates booking completion via a node-cron scheduled job and includes Jest unit tests with mocked database calls.

SECONDARY EDUCATION

ST. MARY'S COLLEGE OF MEYCAUAYAN

2019 — 2021

Senior High School · Accountancy, Business and Management (ABM) Strand

TECHNICAL SKILLS

LANGUAGES

C#, JavaScript, TypeScript, Python, Java

BACKEND

ASP.NET Core, .NET Core, .NET Framework, Express.js, EF Core, NextJS

FRONTEND

React, NextJS, Tailwind CSS, Bootstrap, HTML5, CSS3

DATABASES

PostgreSQL, MySQL, MariaDB, MS SQL, Neon DB, Redis

AI-ASSISTED DEVELOPMENT

Claude Code, GitHub Copilot, Agentic coding workflows, Spec-first prompting, Architecture & tradeoff negotiation, AI-generated code review, Test-gated AI output

TOOLS & PLATFORMS

Git, GitHub, JIRA, Figma, Visual Studio, VS Code, JetBrains, Docker, Cloudflare R2, Render, Vercel

PROTOCOLS & PATTERNS

RESTful APIs, gRPC, Microservices, MVC, Modular Monolith

ADDITIONAL SKILLS

SOFT SKILLS

Problem Solving, Analytical Thinking, Communication, Team Collaboration, Time Management, Adaptability

MICROSOFT 365 & OFFICE

Word, Excel, PowerPoint, Outlook, Teams, OneDrive; basic tenant/license administration via the Microsoft 365 Developer Program (no SharePoint experience yet)

GENERAL & PRODUCTIVITY

Google Docs, Google Sheets, Google Slides, Zoom, Google Meet, Typing (75+ WPM)

PHOTO & VIDEO

Adobe Photoshop, Adobe Firefly, Gemini Nano, Adobe Premiere Pro, CapCut, iMovie

DESIGN & MEDIA

Canva, Social Media Management, Photography (mobile)

DATA ENTRY & ADMIN

Log digitization, Google Sheets encoding, Filing & records management, Printing & scanning, Email correspondence

IT & TECHNICAL SUPPORT

PC troubleshooting & formatting, Hardware setup & maintenance, NC2: Computer Systems Servicing

RESEARCH & WRITING

Academic research, Report writing, Technical documentation, Data analysis & summarization

LANGUAGES

Filipino — Native, English — Professional proficiency
